

## **\$LUFC Fan Token Offering Fact Sheet**

### **1. Token & Project Information**

- Official Project Name & Token Symbol: \$LUFC Fan Token
- Project Website & Official Channels: socios.com
- Issuer: Socios Technologies AG
- Club Partner: Leeds United Football Club

Whitepaper / Technical Documentation Summary:

- Token Utility: Provides access to exclusive fan engagement features, experiences, and rewards — including VIP matchday events, polls, signed merchandise, stadium tours, and digital collectibles.
- Usage within Socios Platform: Enables participation in club polls, access to fan experiences, and earning loyalty points redeemable for rewards through the Socios.com app.
- Differentiation: \$LUFC has been one of the first available and a true pillar of the fan token ecosystem, offering exclusive digital and real-world utilities with the potential of expanding to product functionality within the Chiliz Chain ecosystem.

### **2. Tokenomics & Distribution Plan**

- Total Supply: 10,000,000 \$LUFC
- Initial Circulating Supply at Launch: 1,000,000 \$LUFC (public offering portion)

Token Allocation:

- Public Offering (Locker Room campaign): 1,000,000 \$LUFC
- Retained by Issuer (Socios Technologies AG): Remaining non-circulating supply
- Vesting & Lock-ups: Not specified (tokens distributed directly to holders upon conversion)
- Emission Schedule: No inflationary mechanism; fixed total supply

### **3. Team & Governance**

- Issuer / Offeror: Socios Technologies AG (Zug, Switzerland)
- Management:
  - Alexandre Dreyfus – Director
  - Markus Spillmann – Director

- Governance Model: Centralised issuer control

The centralized nature of the token is determined by the offeror (Socios Technologies AG) in collaboration with the Club., specifically in: i) Deciding how the non-circulating supply (tokens not offered in the FTO and retained by the offeror) is unlocked over time and ii) Making decisions on future utility to be provided.

There is neither a DAO nor governance voting rights attached to the token. However, there will technically be polls in which users can participate by owning the fan token. That said, this does not constitute governance; rather, it falls under a fan engagement program.

- Decision-Making: Token holders can participate in non-managerial, club-related polls (e.g., stadium messages, music choices) but hold no corporate voting or financial rights.

#### 4. **Smart Contract & Security**

- Blockchain: Chiliz Chain (EVM-compatible, CAP-20 standard)
- Smart Contract Address: 0xF67A8a4299f7EBF0c58DbFb38941D0867f300C30 (Chiliz Chain-based CAP-20 contract deployed)
- Security Audits: Chiliz Chain audited by Halborn (2022, with follow-up in 2024). All core contracts audited before deployment; no major vulnerabilities reported post-audit.
- Bug Bounty Programs: None specifically mentioned for \$LUFC, but Chiliz maintains ongoing validator and contract security audits.

#### 5. **Market Strategy & Exchange Plans**

- Exchange Listings: Kayen.
- Liquidity Provisions: Managed through exchange listings; no liquidity pools on DEXs have been disclosed.
- Trading Pairs: Typically \$LUFC/CHZ, \$LUFC/USDT, and \$LUFC/BTC on CEXs

#### 6. **Legal & Compliance**

- Jurisdiction of Issuance: Switzerland (Socios Technologies AG, Zug)
- Applicable Law: Swiss law (Issuer).
- Regulatory Status: White Paper compliant with Regulation (EU) 2023/1114 (MiCA).
